(54) **Display apparatus and board usable therein**

(57) A display apparatus including a user input and an infrared module which are structurally separated is provided. The display apparatus includes an image processor which processes an image signal, a display which displays the processed image thereon, a remote control receiver which receives a user's command, a user input which receives a user's selection, a controller which controls the image processor, the display, the remote control receiver and the user input. The controller and the user input are provided in the same board, and the remote control receiver is connected through a connector to the board in which the controller is provided.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 13 16 7718

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
