(54) **Cap for containers of producs for use by children**

(57) In order not to be swallowed by a child when opening with the teeth, the cap of this invention is formed from a base (1) adaptable to the neck of the container, with a conical portion (4), convergent towards its free end, so that in correspondence with the vertex of this conical portion it incorporates an axial orifice (5) designed to receive a small cylindrical seal (6), and of diameter adjusted to that of the orifice. The base of the cap and the seal are interconnected with single-piece character by a kind of side handle (8).
