(54) **Wall bracket and working platform**

(57) A wall bracket is provided for facilitating construction work, as a surface for a person or another load. The wall bracket comprises a plurality of support structures (110) to be fastened to a wall in parallel and at a distance from one another and, resting thereon, parallel working platform frames (150) settling at a distance from one another for supporting working platforms (252, 253)

comprised by the wall bracket. In the invention, the working platforms are such that the working platform comprises a self-supporting wall (261 to 267, 271 to 277) and that at least an end area of the self-supporting wall is provided with an overlap area (L) for resting on an adjacent working platform.
