(54) **Indoor unit of air conditioner**

(57) Provided is an indoor unit (1) of an air conditioner capable of preventing breakage and damage to a pipe cover (13) and to other equipment when the indoor unit (1) falls down, and also capable of providing the pipe cover (13) commonly used for a change in capacity of the indoor heat exchanger (4). The indoor unit (1) of an air conditioner includes: a unit body (2) in which an indoor heat exchanger (4) is disposed; and a pipe cover (13) that covers a front of an exposed portion of heat exchanger piping (12) at an end portion of the indoor heat exchanger (4), and that prevents water drops dew-condensed on a surface of the heat exchanger piping (12) from splashing, wherein the pipe cover (13) includes an end fixing portion (15) fixedly disposed to the heat exchanger piping (12) of the indoor heat exchanger (4); a counter-end fixing portion (16) fixedly disposed to the unit body (2), or to other equipment fixedly disposed in the unit body (2); and an impact absorbing portion (17) provided at an appropriate position between the end fixing portion (15) and the counter-end fixing portion (16) of the pipe cover (13). CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
