(54) **Textile machine**

(57) A textile machine (1) comprises a plurality of yarn processing units (2), and a machine control device (60) adapted to receive information relating to each spinning unit (2) and to manage each constituent element of the textile machine (1). Each of the yarn processing units (2) includes an overall view display section on a front side thereof, which displays an overall view (81) showing an overall structure of the yarn processing unit (2), wherein the overall view display section includes identify-and-display sections (821, 822, 823, 921, 922, 923, 924), which, when an error occurs in a section of the yarn processing unit (2), carry out a display by identifying a section within the overall view (81) that corresponds to the error occurred section.

Munich	2 November 2017	Herry-Martin, D

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO. EP 14 15 0316

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
