(54) **Transparent conductive film manufacturing method, apparatus thereof, and transparent conductive film thereof**

(57) The present invention provides a transparent conductive film manufacturing method which easily fills a metal paste in a concave groove of a minute pattern and simplifies the process. An exemplary embodiment of the present invention provides a transparent conductive film manufacturing method including: a first step of processing one surface of a transparent film with plasma to form a hydrophobic surface with minute protrusions and grooves; a second step of patterning a hydrophilic pattern groove on one surface of the transparent film; a third step of dispensing a conductive paste onto the pattern groove of the transparent film; and a fourth step of drying and hardening the conductive paste.
