(54) Refrigerator

(57) The present invention relates to a refrigerator. The refrigerator (1) includes: a cabinet (2) having a storage compartment (20); a door (3) used to enclose the storage compartment (20); a drawer (72) located inside the storage compartment (20), a gap (G) being provided in the vertical direction between a front wall (751) of the drawer (72) and a top wall (24) of the storage compartment (20); and a cold air outlet (61), the cold air outlet (61) being located between the drawer (72) and the top

wall (24) in the vertical direction. According to recommendations of the present invention, the refrigerator includes a cold air blocking portion (8) located between the cold air outlet (61) and the door (3), and the cold air blocking portion (8) at least partially covers the gap (G) in a front-rear direction. Therefore, a temperature difference between inside and outside of the door can be reduced without energy consumption to lower the possibility of condensation on the door appear.

The present search report has been drawn up for all claims			
Place of search	Date of completion of the search	Examiner	
The Hague	20 March 2015	Kolev, Ivelin	
CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone	T : theory or principle underlying the invention		
Y : particularly relevant if combined with another document of the same category	E : earlier patent document, but published on, or after the filing date		
A : technological background	D : document cited in the application		
O : non-written disclosure	L : document cited for other reasons		
P : intermediate document	& : member of the same patent family, corresponding document		

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 14 17 2718

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
