(54) **Electrical connector assembly**

(57) An electrical connector assembly including a mounting ring having an interior region, a sealing surface at one axial end for securing to a surface, and a securement rim at an opposite axial end. A connector body having

engagement surfaces can engage and seal to the mounting ring. The connector body can include electrical terminals extending into the interior region of the mounting ring for engaging mating electrical terminals.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 14 18 2592

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
