(54) **Door for refrigerator and refrigerator**

(57) The present invention relates to a door for a refrigerator and a refrigerator. The door (1) includes a door body (2) and a decorative panel (3) in front of the door body, where the door body includes a front panel (211), a door liner (22), a periphery cover (23) connected between the front panel (211) and the door liner (22), and a heat insulation layer (25). The door body further includes an operation and/or display unit (7) and a system housing (8) having an accommodating space (80) that accommodates the operation and/or display unit, where the system housing is connected to the front panel (211), the front panel has an opening (2116) connected to the accommodating space (80), and the operation and/or display unit is attached to a rear side of the decorative panel. According to the present invention, the periphery cover (23) is provided with an insertion channel (91) connected to the accommodating space (80), and the insertion channel and the accommodating space (80) are located at a rear side of the front panel (211) and are isolated from the heat insulation layer (25).
