(54) **Luminaire**

(57) Luminaire which incorporates as source or light sources LEDs or other lights whose heat is dissipated towards their rear part and is structurally designed to favour the dissipation of the said heat avoiding any negative effect on the various elements that comprise the lighting fixture. The housing comprises two areas, one lower area (4a) and one upper area (4b) separated by, at least one point of juncture (4c, 4d), that determines the existence of at least one intermediate space (5) between the upper area (4b) comprising a housing (7) for several components and the lower area (4a) comprising the lamps (2) and the lamp-holding support (3).
