(54) **Inkjet printhead, inkjet recording apparatus, and method for adjusting position of inkjet printhead**

(57) An inkjet printhead includes a support supporting a nozzle-formed member and including a pair of projections. One of the projections includes first and second surfaces, and the other of the projections includes a contact surface. The first and second surfaces and the contact surface each include a touch part for positioning of the inkjet printhead to a first position on a frame. A positioning member including a touch surface is attached to

one of the projections in such a way that (i) the first surface and the touch surface, (ii) the second surface and the touch surface, or (iii) two touch surfaces of the positioning member allow the inkjet printhead to be positioned at a position different from the first position when the inkjet printhead is at a predetermined mounting position on the frame.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
 Y : particularly relevant if combined with another document of the same category
 A : technological background
 O : non-written disclosure
 P : intermediate document

T : theory or principle underlying the invention
 E : earlier patent document, but published on, or after the filing date
 D : document cited in the application
 L : document cited for other reasons

& : member of the same patent family, corresponding document

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 15 15 3164

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
