(54) **VIAL TRANSPORT MECHANISM**

(57) A device for transferring a container (100, 101, 102) from a first location (5) to a second location (6) includes a first container guide (31) defining a linear path between the first location and the second location, a second container guide (21) defining a second linear path

between the first location and the second location, the second linear path having at least a change in path direction, and a motor unit (4) creating a relative movement between the first guide and the second guide.
