(54) **ASEISMIC LOFT**

(57) An aseismic loft comprises at least a plurality of upright (3), of elongated tubular shape with flat longitudinal faces, and a plurality of beam (5) assigned, in an assembled condition of the loft, to be respectively vertical and horizontal and to be mutually connected.

The upper end of each upright (3) has two first con-

nection means (7) each with "U" square shaped cross section and whose median face (8) is fixed to a corresponding face of upright (3).

At least one of the lateral faces (9) of the first connection means (7) is fixed to one end of one of the beam (5).

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing claims for which payment was due.

10

Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due and for those claims for which claims fees have been paid, namely claim(s):

15

No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due.

20

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

25

see sheet B

30

All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

35

As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

40

Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:

45

None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

50

1-3

55

The present supplementary European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims (Rule 164 (1) EPC).

5

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

10

1. claims: 1-3

Nuts located at holes of connection means to simplify mounting of locking screws.

15

2. claims: 4, 5, 9

Beams having a "C" or double "C"-section for beams modularization.

20

3. claims: 6, 7

Connecting means for connecting handrail stanchions to a platform.

25

4. claim: 8

Connection of a foot to an upright.

30

5. claim: 10

Connection of stairs to a platform.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 15 17 7781

5 This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
