(54) **ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS**

(57) Attire for facilitating the use of stones for chakras, characterised in that it comprises one or more garments (10, 11, 12, 13) covering, as a whole, at least the trunk of the user, from the neck to the crotch, in which there is a series of pockets (2) that are vertically aligned in relation to the centre thereof and arranged, on the front part and/or the rear part of said garment or garments, so as to match some of the points of the body of the user known as "chakras", i.e. the perineum, the sacrum, the solar plexus, the heart and the throat, said pockets being able to receive a stone (3) within each one.

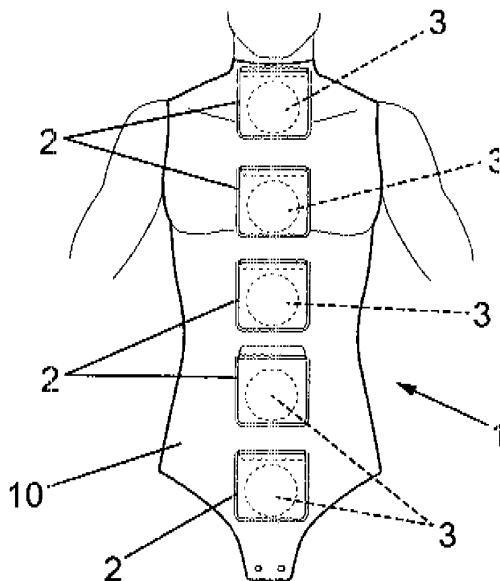

FIG. 1

Description**OBJECT OF THE INVENTION**

[0001] The invention, as exposed on the wording of the present specification, relates to an attire for facilitating the use of stones for chakras which imparts to the function it is intended to, advantages and characteristics, which will be described in detail below and which mean a remarkable novelty.

[0002] More specifically, the object of the invention is focused on one or more garments provided with a set of pockets strategically located in coincidence with the points of the user's body where the energy centres known as "chakras" are located, with the purpose of allowing the placement in them of certain stones whose properties are capable of helping the energy channelling so that the energy of these chakras flows.

APPLICATION FIELD OF THE INVENTION

[0003] The field of application of the present invention is framed within the sector of the clothing industry, while focusing on the field of industry dedicated to the manufacture of support elements and accessories for performing body energy activation treatments.

BACKGROUND OF THE INVENTION

[0004] According to Hinduism, the *chakras* are immeasurable (non-measurable) energy centres located in the human body. According to Hindu doctrines, the chakras are six, but according to theosophy and Gnosticism there are seven.

[0005] Said *chakras* are located in points aligned and distributed along the longitudinal axis of the body consisting specifically of the following: root chakra 1, located in the area of the perineum; 2 sacral chakra, located in the area of the sacrum; solar plexus chakra 3, located in the solar plexus; heart chakra 4, at the height of the heart; throat chakra 5, in the throat; chakra 6 of the third eye, located on the forehead; and crown chakra 7, above the head.

[0006] On the other hand, thanks to the physical properties of minerals and semiprecious stones, constituted in the geological process of their formation, it is considered that they can channel energy.

[0007] Therefore, it is understood that when the energetic properties of semiprecious stones are united, with the energy points of the body constituted by the aforementioned chakras, the capacity of energy channelling of the minerals can be used to help unlock the chakras so that vital energy flows.

[0008] In addition, to optimize said capacity, each chakra has an associated semiprecious stone that helps to channel the energy of that particular chakra, said association being normally the following:

5 CHAKRA 1.- Ruby, red coral, garnet and red jasper
CHAKRA 2.- Amber, carnelian agate, moonstone, orange citrine and orange calcite.

10 CHAKRA 3.- Citrine quartz, tiger's eye, yellow aventurine, yellow topaz, pyrite and amber
CHAKRA 4.- Emerald, prehnite, green quartz, jade, green agate and green aventurine, green quartz, venturine and olivine.

15 CHAKRA 5.- Turquoise, angelite, chalcedony and blue topaz.
CHAKRA 6.- Amethyst, Sodalite, amethyst, Lapis Lazuli
CHAKRA 7.- Crystal quartz, transparent quartz, golden calcite, amethyst, selenite, diamond.

[0009] And, the purpose is to channel the energy in the different organs of the human body, specifically as follows:

20 CHAKRA 1.- Reproductive organs (ovaries, testicles) and prostate.

CHAKRA 2.- Abdomen, spleen.

CHAKRA 3.- Abdomen, intestine

CHAKRA 4.- Heart and lungs.

CHAKRA 5.- Throat, voice, thyroid

CHAKRA 6.- Brain.

CHAKRA 7.- Head. It is associated with knowledge, understanding and everything that has to do with the mind. Our union with the Universe, the will, the inspiration.

[0010] The most important benefits are:

- Revitalize each aural or energetic body and with it the physical body.
- Cause the development of different aspects of self-awareness, since each CHAKRA is related to a specific psychological function
- Transmit energy between the aural levels. Almost all physical ailments begin in the emotional field. Health and its problems are directly related to these energy points that control the balance of emotions.

[0011] In any case, said channelling occurs through the placement of the stones on the back of the person, coinciding with the points of the mentioned chakras. The greater the contact exposure between the stone and the chakra, the more efficacy it will produce.

[0012] It would be desirable, then, to have a means to be able to use the stones in any position and moment, since until now, in order to achieve the aforementioned benefits it is essential to be lying and motionless with the stones located on the chakras.

[0013] The attire of the invention has said objective, that is to say, to be able to take advantage of the properties of the stones in any position thanks to the design of the pockets provided therein, allowing users to use it, to be able to carry the stones without any problem and

discomfort, no time limit or restriction, which can constantly benefit from its effect.

[0014] As a reference to the current state of the art, it should be noted that, although there are innumerable types and models of garments with pockets of all kinds, at least on the part of the applicant, it is unknown the existence of any other garment with a similar application or presenting technical, structural and constitutive characteristics equal to or similar to those presented in the garment that is recommended herein and as claimed.

EXPLANATION OF THE INVENTION

[0015] Thus, the attire for facilitating the use of stones for chakras proposed by the present invention is configured as a remarkable novelty within its application field, as, according to its implementation and unequivocally, the objects above pointed as suitable are satisfactorily achieved, being the characterizing details that distinguish it conveniently collected in the final claims accompanying the present description.

[0016] Specifically, what the invention proposes, as noted above, is an attire that, consisting of one or more garments, covers, at least the user's trunk from the neck to the crotch, presenting the particularity of having a set of pockets strategically located in coincidence with the points of the body of the user in which the so-called "chakras" are located, in order to allow the placement inside each of said pockets of a certain type of stone that helps to channel the body energy at said points.

[0017] More specifically, the attire consists of either a camisole or a t-shirt and a slip or panty, depending on whether it is for men or women, in whose front part and, preferably also, at the rear part, it has five pockets aligned in its centre in coincidence with the points of the body in which the chakras are found, that is, at the height of the perineum, the sacrum, the solar plexus, the heart and the throat.

[0018] Logically, depending on the sizes, this position may vary from one t-shirt to another so that they adapt to each person, without ruling out the possibility that the pockets are of non-permanent fixation, for example by Velcro strips, buttons, zippers or other means, and they can move their position to adjust them to given person.

[0019] In any case, the pockets can be incorporated by the outer part or by the inner part of the garment and present variable size to adapt to the stones.

[0020] Additionally, the attire also contemplates one more head garments, which, consisting of a band or hat, has at least one pocket more likely to be able to be in coincidence with the forehead and with the upper part of the head of the user.

[0021] The described Attire for facilitating the use of stones for chakras represents, thus, an innovation with structural and constitutive characteristics unknown so far, reasons which in combination with its practical utility, provide it with enough basis to obtain the exclusivity privilege which is applied for.

DESCRIPTION OF THE DRAWINGS

[0022] In order to complete the description being made and to ease a better understanding of the characteristics of the invention, we attach to the present specification, making part of the same, a set of layouts where, with an illustrative non limitative character, the following has been represented:

5 10 Figures 1 and 2.- show elevational views, of the front part and rear part, respectively, of a first embodiment of the attire for facilitating the use of stones for chakras, object of the invention, specifically an example consisting of a camisole, being appreciated the parts and elements that it comprises, as well as their arrangement, in particular the pockets to incorporate the stones.

15 20 Figures 3 and 4.- show elevational views, of the front part and rear part respectively, of a second example of embodiment of the attire of the invention, in this case an example consisting of t-shirt and slip or panty.

25 30 35 **[0023]** And figures 5 and 6.- show two perspective views of a headband and a cap, respectively, as an additional accessory element of the garment, according to the invention, to place stones in the forehead and/or the crown chakra.

PREFERENTIAL EMBODIMENT OF THE INVENTION

[0024] In light of the mentioned figures, and according to the numbering taken on them, can be seen in them 35 different examples of the attire of the invention, which comprises the parts and elements indicated and described in detail below.

[0025] Thus, as observed in said figures, the attire (1) in question is made up of one or more garments (10, 11, 40 12, 13) which together cover at least the user's trunk from the neck to the crotch, in which a series of pockets (2), preferably five, vertically aligned in its centre and located, by the front and/or rear parts thereof, are contemplated, coinciding with some of the known points of the body of the user as "chakras", that is to say, at the height of the perineum, the sacral bone, the solar plexus, the heart and the throat, intended to each house inside a stone (3) that helps to channel the energy of the body in said points.

[0026] According to figures 1 and 2, it is observed how, 45 in an embodiment option, the attire (1) is a camisole type garment (10) with five pockets (2) in its front part (figure 1) and five pockets (2) in its rear part (figure 2) coinciding with the points indicated above.

[0027] And, in an alternative embodiment option, 50 appreciable in Figures 3 and 4, the attire (1) is made up of two garments, a t-shirt (11) and a slip or panty (12), having the shirt (11) four pockets (2) in its front part, coinciding with four points of "chakras", those located at the height

of the sacrum, the solar plexus, the heart and the throat (figure 3), and, preferably, with four pockets (2) more, located at the same heights in the rear part (figure 4), while the slip or panty (12) has one or two more pockets (2) in the front part and, optionally, the rear part, which will coincide with the chakra of the perineum area.

[0028] Additionally, the attire (1) also contemplates a head garment (13), consisting of a band or a cap, which, with at least one other pocket (2) or two, is capable of being in coincidence with the forehead and/or with the top of the head. An example of said head garment (13) constituted as a band with a single pocket (2) for incorporating stones (3) is shown in Figure 5, while Figure 6 shows an alternative option in which the head garment (13) is a cap with two pockets (2) to incorporate stones (3).

[0029] In any case, all pockets (2) may be incorporated into the garments (10, 11, 12, 13) in a fixed and permanent manner or by means of non-permanent fixing means, such as Velcro strips, buttons, zippers or other means, which allow them to move their position to adjust them to a given person in coincidence with the areas of the chakras.

[0030] In addition, the pockets (2) can be incorporated by the outer part or by the inner part of the garment and have a variable size to adapt to different sizes of stones, which, preferably, have a size of about 2.5 cm in diameter and a thickness between 1.5 and 2.5 cm.

[0031] Having sufficiently described the nature of the present invention, as well as a way of putting it into practice, it is not considered necessary to make a more extensive explanation in order that any expert in this area will understand its scope and the advantages that can be derived from it, making known that, within reason it could be put into practice in other embodiments differing in detail from that indicated by way of example, and which will obtain the same degree of protection, provided that they do not alter, change, or modify its fundamental principle.

Claims

1. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, **characterised in that** it comprises one or more one garments (10, 11, 12, 13) covering, as a whole, at least the trunk of the user, from the neck to the crotch, in which there is a series of pockets (2) that are vertically aligned in relation to the centre thereof and arranged, on the front part and/or the rear part of said garment or garments, so as to match some of the points of the body of the user known as "chakras", i.e. the perineum, the sacrum, the solar plexus, the heart and the throat, said pockets being able to receive a stone (3) within each one.
2. ATTIRE FOR FACILITATING THE USE OF

STONES FOR CHAKRAS, according to claim 1, **characterized in that** it comprises five pockets (2) in its front part and five pockets (2) in its rear part in said points.

3. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to claim 1 or 2, **characterized in that** it comprises a camisole type garment (10).
4. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to claim 1 or 2, **characterized in that** it comprises two garments, a T-shirt (11) with at least four pockets (2) and a slip or panty (12) with at least a pocket (2).
5. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to claim 3, **characterized in that** the T-shirt (11) has four pockets (2) in its front part, coinciding with four "chakras" located at the height of the sacrum, solar plexus, heart and throat and with four pockets (2) located at the same heights on the rear part, and the slip or panty (12) has two pockets (2) on the front and rear parts, which coincide with the chakra of the perineum area.
6. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to any one of claims 1 to 5, **characterized in that** it also comprises a head garment (13) with at least one other pocket (2) capable of being in coincidence with the forehead or with the top of the head.
7. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to claim 6, **characterized in that** the head garment (13) is a band with a pocket (2).
8. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to claim 6, **characterized in that** the head garment (13) is a cap with two pockets (2).
9. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to any of claims 1 to 8, **characterized in that** all pockets (2) are incorporated into the garment or garments (10, 11, 12, 13) in a fixed and permanent manner.
10. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to any of claims 1 to 8, **characterized in that** all the pockets (2) are incorporated into the garment or garments (10, 11, 12, 13) by means of non-permanent fixing means, such as Velcro strips, buttons, zippers or other means, which allow to move their position to adjust to a given person in coincidence with the areas of

the chakras.

11. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to any of claims 1 to 10, **characterized in that** all pockets (2) ⁵ are incorporated into the garment or garments (10, 11, 12, 13) on the outer part thereof.
12. ATTIRE FOR FACILITATING THE USE OF STONES FOR CHAKRAS, according to any of ¹⁰ claims 1 to 10, **characterized in that** all pockets (2) are incorporated into the garment or garments (10, 11, 12, 13) on the inner part thereof.
