## (54) INJECTION MOLDING SYSTEM AND INJECTION MOLDING METHOD

(57) An injection molding system includes an injection molding machine, an automatic inspecting device and a defect correction module. The injection molding machine is adapted to inject and form a product according to an injection molding parameter. The automatic inspecting device is adapted to inspect the product to generate inspection data. The defect correction module is adapted to generate a calibrating parameter according to the inspection data. The injection molding machine is adapted to inject and form another product according to the injection molding parameter and the calibrating parameter. In addition, an injection molding method is also provided.
