(54) **THREAD OF A SCREW CONNECTION BETWEEN A FIRST MODULE AND A SECOND MODULE**

(57) The invention relates to a thread of a screw connection between a first module (56) and a second module (58), wherein a first connecting element (52) of the first module (56) has a first screw thread profile (22) and a second connecting element (54) of the second module (58) has a second screw thread profile (24, 26), wherein the first screw thread profile (22) is configured such that the first connecting element (52) is suited to be screw-connected to the second connecting element (54), wherein the first screw thread profile (22) has a reduced cross-sectional thread area in relation to a standardized screw thread (26).
