Remarks:

This application was filed on 01-03-2023 as a
divisional application to the application mentioned
under INID code 62.

(54) **METHOD FOR BOWEL PREPARATION**

(57) The present invention provides methods for facilitating cleansing of the gastrointestinal tract of a patient prior to a diagnostic, surgical or therapeutic procedure. The methods can improve patient compliance, and thus, efficacy of the preparation. Specifically, the present methods make the gastrointestinal tract preparation composition palatable for the patient to consume. For example, for a patient preparing to undergo colonoscopy, the present methods make the bowel preparation solution taste significantly less salty.
