(54) **DOWNSCALED DECODING**

(57) A downscaled version of an audio decoding procedure may more effectively and/or at improved compliance maintenance be achieved if the synthesis window used for downscaled audio decoding is a downsampled version of a reference synthesis window involved in the

non-downscaled audio decoding procedure by down-sampling by the downsampling factor by which the down-sampled sampling rate and the original sampling rate deviate, and downsampled using a segmental interpolation in segments of 1/4 of the frame length.
