NODES AND METHODS FOR RANDOM ACCESS IN DUAL CONNECTIVITY

- (57)

Example embodiments presented herein are di-
rected towards an anchor base station (401A), an assist-
ing base station (401 B) and a wireless terminal (505),
- and corresponding methods therein, for establishing dual
connectivity between a wireless terminal and the assist-
ing base station.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
