(54) **KIT AND METHOD OF IMPLEMENTING LIGHT-DENSITY PASSENGER RAILWAY DEPLOYMENT ON A PRE-EXISTING TRACK**

(57) Disclosed is a customisable railway installation kit suitable for installing onto at least a track that is pre-existing, at least partially pre-existing or not pre-existing, the kit having components including: a) a Rail Vehicle ("RV") component comprising a number of RVs that are preconfigured for operation on the track; b) a platform component comprising at least one of: a platform design that is usable to construct a number of platforms adjacent the track, a number of preconfigured platforms and an installation guide that is usable to install the preconfigured adjacent the track and/or a number of installed preconfigured platforms that are situated adjacent the track; c) shop component suitable for inspection, servicing, repair or cleaning of each RV,

comprising at least one of: a shop plan that comprises at least one of a shop design and an equipment guide, the shop design being usable to construct a shop in the vicinity of the track, the equipment guide comprising a description that comprises a number of specifications of a set of equipment that is usable to service the number of RVs and a number of positions in the shop where the set of equipment can be situated, a preconfigured shop kit from which the shop can be constructed with the use of the shop design, and/or a set of equipment that can be positioned in the shop according to the equipment guide; and d) an amount of applications engineering.
