(54) MEDICAL VISUALIZATION SYSTEM

(57) A medical visualization system comprising a video processing apparatus and an endoscope is disclosed. The video processing apparatus is operable to receive image data from the endoscope. The video processing apparatus comprises a housing and a processor adapted to receive the image data from the one or more endoscopes and cause a display to display a live representation of the image data. The system further comprises a transmission component adapted to transmit the image data and/or the data representative of the image data to the video processing apparatus, the transmission component comprising a component coupling part adapted to couple with the device coupling part.

Munich	11 September 2026	Höß, Theresa

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons
& : member of the same patent family, corresponding document
