(54) **FLOW CONTROL DEVICE**

(57) Disclosed is a pilot pressure system, comprising a flow path comprising a first inlet and a first outlet, wherein the flow path is configured to create a specific pressure drop between the first inlet and first outlet based upon one or more characteristics of a fluid flowing within the flow path. The pilot pressure system further comprises a pilot pressure line, the pilot pressure line comprising a second inlet and a second outlet, wherein the second inlet is configured to allow the pilot control line to be in pressure communication with the flow path, and the second outlet of the pilot control line is configured to be connected to a sealed pilot pressure chamber of a downhole flow control device.

Place of search Munich		Date of completion of the search 1 September 2026	Examiner Morrish, Susan
CATEGORY OF CITED DOCUMENTS X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 26 19 4985

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
